

March Newsletter

Synergy's Upcoming Events:

- ♦ March 22nd– Professional Development Day

NO Camp/Care available

- ♦ March 30th– Science Fair

10:00 am—11:30 am

Primary students and Elementary students

What is A Science Fair Project?

A science fair project is a unique way for students to pose questions for which they must seek out answers and to satisfy their own curiosity about the world around them. A science fair project is an experiment, a demonstration, a research effort, a collection of scientific items, or display of scientific apparatus presented for viewing. It represents the efforts of a student's investigation into some area of interest and provides a way for the student to share the results of those investigations. Through the development of a science fair project, students gain a first-hand appreciation of the work of scientists and the value of their discoveries. Look for an email from your teacher in the next weeks with more information .

*** We are looking for volunteers to give feedback to our Elementary school Students on their Science Fair Project. This will be done on March 30th . It is an easy process of using a check list and making comments. If you are science minded and/or interested in volunteering, please let us know.

Synergy Learning Academy
a holistic education for
every child...
